# MobileScan Pro 500i

# Scanner User Guide

# Ambir Sheetfed Scanner User Guide

## Welcome

Thank you for purchasing an Ambir scanner. We have designed this product to provide the user with a simple but effective tool to capture, manage and archive documents of many types. We encourage you to read this short, but important User Guide carefully.

## Installation

⚠ *Please note you must have administrative privileges to install the driver and software for your scanner. If you are unsure of your security privileges, please contact your local IT support.*

### Driver and Software Installation

Before you can use your scanner, you must first download and install the driver. To download the driver, follow these steps:

1. Go to www.ambir.com/ds500-setup/
2. Plug the USB into the back of your scanner and the other end into your computer.
3. Download the driver on the page.
4. Download the AmbirScan software on the page.
5. **Right click** on the downloaded driver and select **Run as Administrator.**
6. **Double Click** the **AmbirScan software** download to complete the installation.

*Note: The AmbirScan 5.0 Software User's Guide can be downloaded at www.ambir.com/support/*
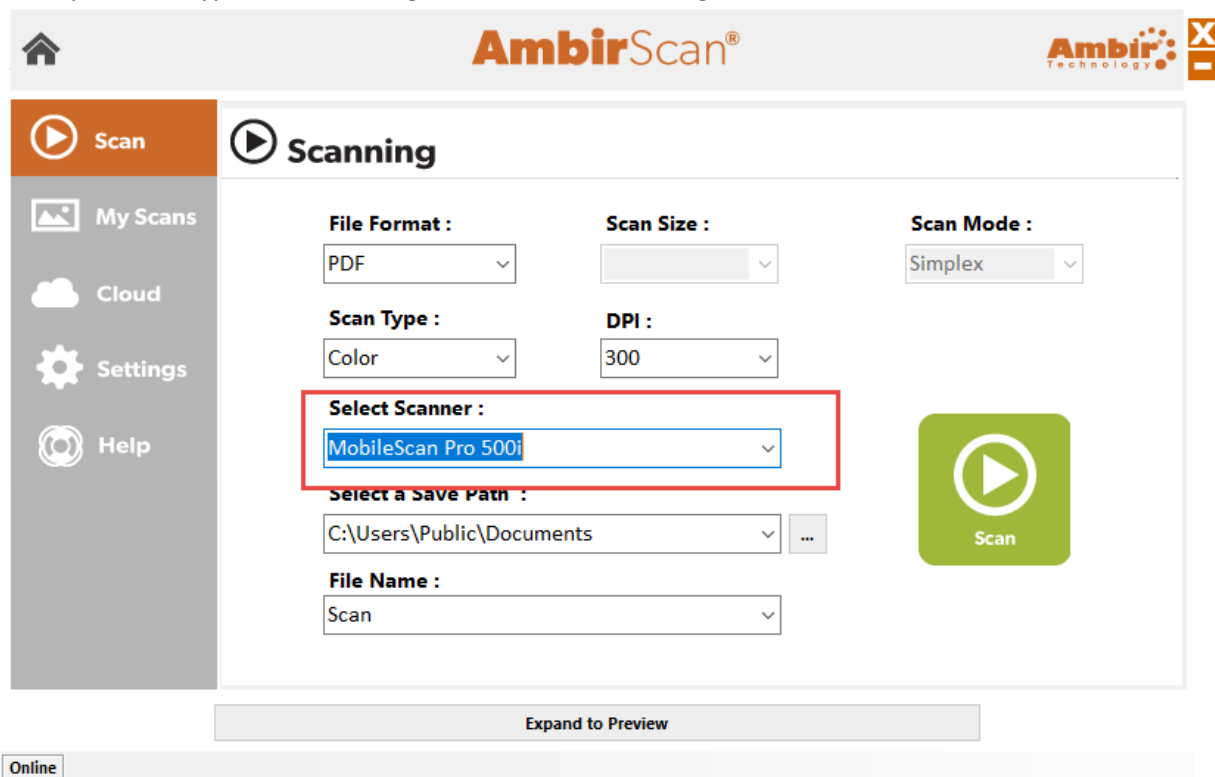

## Powering on Scanner

Hold the **number 2 UP button** for approximately three seconds. The power indicator light will turn green.

## Scanning

To begin scanning, open the AmbirScan software by double clicking the AmbirScan software icon on your desktop. Once open, you should see your scanner in the **Select Scanner** window.

Choose your scan type and click the green **Scan button** to begin.

## Support

If you need assistance with your product, please visit www.ambir.com/ds500-setup for useful FAQs and videos, or email us at ds500support@ambir.com for further assistance.
